

## Sage international payments

### Benefits

- Competitive exchange rates.
- Avoid high fees for wire transfer services.
- Eliminate unnecessary trips to the bank to initiate payment.
- Ability to check status of all payments.
- All beneficiaries notified of a payment.

Sage international payments is made available through our global partnership with Transfermate, a company with over 65,000 clients and a network of offices in the U.S., Asia, Europe, and Africa. Whenever you need to make an international payment, Sage has you covered.

### Competitive rates

Make payments to your vendors and business partners in foreign currencies with the confidence that you are getting the most competitive exchange rates on all transactions. At the same time you are avoiding the high fees typically charged by banks and wire transfer services. And automatic verification of bank details avoids potential penalties due to rejected payments.

### You are in control

Securely log on to your account and initiate a payment when it's convenient for you, avoiding an unnecessary trip to the bank. Check the status of your transaction or view the latest information on foreign exchange rates to determine the optimal time to issue a payment. All of this control and convenience is right at your fingertips.

### A better experience

Each time you initiate a payment, all beneficiaries are notified informing them a payment is on the way. And while you always have access to your account online to initiate and manage international transactions, phone support is available Monday-Friday, 24 hours a day.
